Summary

Results-driven software developer with over 5 years of experience in designing, developing, and maintaining web and mobile applications. Passionate about learning new technologies and improving code efficiency. Skilled in problem-solving and troubleshooting to ensure optimal performance.

Skills

JavaScript (ES6+), Python, Java, C#, TypeScript, Ruby, MySQL, PostgreSQL, MongoDB, Firebase, Docker, Jenkins, Git, CI/CD, AWS (EC2, S3, Lambda), Azure, Jest, Mocha, Selenium

Education

Southwestern University   *Berkeley, CA*
Bachelor of Science in Computer ScienceAug. 2016 – May 2019

Experience

XYZ Tech Solutions   **October 2023 – Present**
Senior Software Developer   *Remote*
Tech stack: React, Node.js, PostgreSQL

- Led a team of 5 developers in building a scalable e-commerce platform using React, Node.js, and PostgreSQL
- Enhanced the application performance by 30% by refactoring core algorithms and optimizing database queries
- Implemented CI/CD pipelines with Jenkins, reducing the deployment time by 40%
- Collaborated with UX/UI designers to create responsive, user-friendly interfaces using React and Material-UI

ABC Digital   **July 2020 – April 2023**
Software Developer   *San Francisco, CA*
Tech stack: Django, Flask, Docker

- Developed RESTful APIs using Django and Flask to integrate third-party services into client applications
- Built and maintained multiple single-page applications (SPA) using Vue.js, ensuring cross-browser compatibility
- Utilized Docker for containerizing applications, simplifying development and deployment environments
- Participated in agile development processes, attending daily stand-ups, sprint planning, and code reviews

Tech Innovators   **August 2019 – May 2020**
Junior Developer   *Los Angeles, CA*
Tech stack: Java, PHP, JavaScript

- Assisted in developing a customer management system using Java and Spring Boot, reducing customer support response times by 25%
- Maintained and updated legacy systems written in PHP and JavaScript
- Gained experience in version control with Git, contributing to code reviews and bug fixes
- Worked closely with QA engineers to perform unit testing and resolve bugs

Projects

- E-Commerce Platform
- Real-Time Chat Application
- Weather Forecast Dashboard
